H. AREAS OF INTEREST

- General Neurosurgery (I can do almost all general neurosurgical procedures including trauma, brain tumors, congenital anomalies, using conventional and microscopic techniques with different approaches)

- Spine Surgery (I can do almost all spinal procedures including cervical, dorsal, and lumbar operations using posterior and anterolateral approaches with or without instrumentations)

- Cranial endoscopic techniques (Including third ventriculostomy, ventricular tumors, and trans-sphenoidal approaches)

- Computer Assisted Neurosurgery

- Gamma Knife Radiosurgery

- Image-Guided Neurosurgery

- Linac Radiosurgery

- Functional and Stereotactic Neurosurgery.
